# A NEW future pathway

The Multi Industry Collaboration Group paired together to design a program to enhance traditional learning pathways to maximise career pathways in a tailored Taster Program to be completed in CHADSTONE VICTORIA.

Traditionally potential students complete an AQF Level 2 as an entry pathway that does not provide Credit Transfers into an AQF Level 3 Trade Qualification specifically designed for one career pathway minimising the potential of expanding their skills into multiple trades. The above courses are traditionally funded with government support.

## Take a Seat With Us! New Taster Program

The **TASTER Program** will enable potential students to engage with the three industries to sample the right course for their future career goals. At successful completion of the Taster Program the student can Credit Transfer their awarded Units of Competency into their preferred Trade Qualification helping fast track through the building block design to be job ready and meet the Australian Skills Shortage. We aim to see the Taster Program recognised as a Nationally Accredited Training Program with Funding for future generations.
